«interface»
DBShapeTypes
ByteOrderDataInputStream
w : byte[]
in : InputStream
din : DataInputStream
ByteOrderDataInputStream(in : InputStream)
readLine() : String
readFloat() : float
readChar() : char
readUnsignedShort() : int
readShort() : short
readUnsignedByte() : int
readBoolean() : boolean
readInt() : byte[] : int
readInt(b : byte[],start : int,len : int) : int
read() : int
skipBytes(n : int) : int
readFully(b : byte[]) : void
readFully(b : byte[],off : int,len : int) : void
readByte() : byte
readUTF() : String
readLong() : long
readLong(byteorder : int) : long
readDouble() : double
readDouble(byteorder : int) : double
readInt() : int
readInt(byteorder : int) : int
getDataInputStream() : DataInputStream
close() : void
reset() : void
mark(readlimit : int) : void
available() : int
ByteOrderDataOutputStream(outstream : OutputStream)
writeShort(v : int) : void
writeChar(v : int) : void
writeInt(v : int) : void
writeInt(v : int,byteorder : int) : void
writeLong(v : long) : void
writeLong(l : long,byteorder : int) : void
writeFloat(v : float) : void
writeDouble(v : double) : void
writeDouble(v : double,byteorder : int) : void
writeChars(s : String) : void
write(b : int) : void
write(b : byte[],off : int,len : int) : void
flush() : void
writeBoolean(v : boolean) : void
writeByte(v : int) : void
writeBytes(s : String) : void
writeUTF(str : String) : void
size() : int
write(b : byte[]) : void
close() : void
SizeComparable
size : double
index : int
SizeComparable(size : double,index : int)
compareTo(osizecomparable : Object) : int
EditableDataInputStream
EditableDataInputStream(in : InputStream)
setStream(in : InputStream) : void
InvalidStateException()
InvalidStateException(message : String)
JTSDataSourceIterator
it : VectorDataSourceIterator
converter : MB2JTSPolygonConverter
empty : Polygon
read(channel : ReadableByteChannel,buffer : ByteBuffer) : int
copy(source : File,target : File) : void
